

# Call to arms: establishing a mentoring scheme

- From Carpentries have become aware:
  - A small amount of knowledge could go a long way to help a new researcher
  - Post course help only worked once (for me)
- Come up with a proposal to:
  - Establish a framework to do some programming mentoring
  - Clear benefit to the mentee ... what about the mentor?
    - Interesting problem space?
- To bootstrap
  - Talent register of mentors
  - Establish a process
  - Report at the next RSE meeting
  - Establish a pilot
- Looking for people to flesh this out
