Icebreaker: Stand Up, Sit Down (2 minutes)

Stand up (or raise your hand) if you'd answer yes to these questions.

Look around to see what your neighbours' answers are.

1) **Do icebreakers make you uncomfortable?**

2) **Have you learned something today?**

3) **Do you think of yourself as a Research Software Engineer?**

Icebreaker: Group Statistics (8 minutes)

Form groups of 4-5 with folks nearby.

Introduce yourselves within the group, chat and quickly **come up with a statistic about the members of your group**.

It can be a number, percentage, etc... e.g.:

"24: the number of coffees consumed by us so far today"

"75% of us have been abroad on holiday so far this year"

"45 minutes: our average commute time"

Choose 1 person to **report** your group's statistic back to the room.
